

inolight CL8

Water-proof USB arc lighter featuring rechargeable Li ion battery and LED flashlight

No flame, no gases, no fuels, recycled, rechargeable, eco-friendly, flight approval, all-weather: The inolight CL 8 dual coil arc pocket lighter incorporates technology into a great looking water-proof shell with rechargeable Lithium-Ion battery. All of this fits in the palm of your hand and your pocket! This technology means no flame or fuel and is powered by a high intensity electric arc ready at the touch of a button. The lighter also has a safety feature, so it will not light up when the lid is closed. Simply charge up via USB and you're ready to go. Thanks to its water-proof, sturdy-built rubber shell and the embedded LED flashlight, the inolight CL 8 is the ideal accessory when going on a camping trip.

Highlights

- Dual arc lighter featuring rechargeable 3.7V Li ion battery
- No fossil fuels necessary - neither Butane nor Gasoline
- Wind and water resistant
- High heat intensity, no flame
- Water-proof housing with rubber surface featuring LED flashlight with SOS mode
